

Mountain Dell Drainage Improvement Project

The County's contractor has begun construction on the **Mountain Dell Drainage Improvement Project**.

Tiffany Construction Co. is working during daylight hours, Monday through Friday with some weekend work possible. Flaggers, signage and other traffic controls will be used as necessary to guide vehicles through the work zone. A construction detour is planned for June and drivers should expect delays during construction and plan travel accordingly. This project is expected to be completed by this summer; however, this schedule is subject to change due to weather or other unforeseen conditions.

Please...be safe and aware of construction activity in your neighborhood!

The **Mountain Dell Drainage Improvement Project** will improve the drainage in the community to accommodate a 100-year flood event. The goal of this project is to decrease the size of the flood-affected area. When completed, the project will provide flood mitigation for 28 structures, including approximately 20 homes and the community's water system, which could positively impact insurance rates for these properties.

During the project, construction information will be regularly updated and posted on the project's web page at www.coconino.az.gov/MountainDellProjects and available on Facebook by "Liking" Coconino County Roads. Residents who have questions can call Community Relations Manager Marc Della Rocca at 928-679-8307 or email Marc at mdella_rocca@coconino.az.gov. Marc will refer all engineering-related requests to those engineers who can best answer them.

If you would like email updates regarding the **Mountain Dell Drainage Improvement Project** or the upcoming **Fort Tuthill Sewer Extension and Utility Project**, then please email Marc at mdella_rocca@coconino.az.gov with "Add Me to Mt. Dell Projects E-mail List" in the subject line. Thank you.
