

Coconino County Parks and Recreation's (CCPR) re-opening plan includes fluidity in order to execute the plan with safety, health and availability of PPE, cleaning and disinfectants as the backbone principles. CCPR will continue to monitor and deploy protocols that align with Center for Disease Control and Prevention (CDC), Arizona Department of Health Services (ADHS), and Coconino County Health and Human Services (HHS) guidelines. The re-opening phases noted below shall be implemented based on directives received through Governor Executive Orders, County Board of Supervisors and County Management.

Considerations for Re-opening Events

- Governor Ducey Executive Orders and directives.
- CDC Public health control activities by level of COVID-19 community transmission.
 - **None to Minimal** - Evidence of isolated cases or limited community transmission, case investigations underway, no evidence of exposure in large communal setting, e.g., healthcare facility, school, mass gathering
 - **Minimal to Moderate** - Widespread and/or sustained transmission with high likelihood or confirmed exposure within communal settings with potential for rapid increase in suspect cases.
 - **Substantial** - Large scale community transmission, healthcare staffing significantly impacted, multiple cases within communal settings like healthcare facilities, schools, mass gatherings etc.
- Cases may vary from day to day, thus weekly comparisons will be utilized as they offer greater consistency.
- County Health and Human Services Department's determination of transmission levels is determined by investigations demonstrating transmission is or is not occurring in communal settings.
- Transmission levels may vary between communities and park reopening's will be evaluated and approved on a case by case basis.
- CDC, ADHS and CCHHS recommendations and guidelines for park facilities.
- Current CDC guidelines do not recommend disinfecting playgrounds, picnic tables, and ramadas. When open, CCPR will continue with standard frequency and practice for cleaning these amenities.
- Staff's ability to safely clean and disinfect park amenities daily.
- Fort Tuthill County Park Commercial Building being an active COVID-19 testing site. Navajo Ramada rentals may not impact traffic ingress and egress of testing site or testing site equipment i.e. traffic control devices, tent, portable restroom.
- Direction from Coconino County Board of Supervisors, County Managers Office and Health and Human Services Department.

Phasing Trajectory Criteria, Tracking and Communication Plan

- Staff will monitor the COVID-19 Data Dashboard's *Weekly COVID -19 Cases by Geographic Region* Graph which is posted on the County website and updated every Wednesday by 10 a.m.
- When the same upward or downward trend occurs over a two-week period, CCPR staff will verify community level transmission phase changes with CCHHS.
- For ramada reservations scheduled within two weeks of an upward two-week trend in COVID-19 cases, CCPR will consult with new and existing permit holders, CCHHS and County Management on appropriate modifications, postponement or cancellation of reservations.
- Park amenity closures and reopening's will be affected by trends in COVID-19 cases.

Park Amenity Phased Re-opening

Phase One: Substantial Levels of COVID-19 Transmission

- Ramadas, playgrounds, restrooms, water fountains, and sport courts will close.
- Trails, bike park, and disc golf will be evaluated and a decision to close will be made based on the severity of transmission levels.

Phase Two: Minimal to Moderate Levels of COVID-19 Transmission

- Open sport courts, ramadas, restrooms and water fountains.
 - Signage will be placed at restrooms and water fountains - *"Restrooms and water fountains are cleaned and disinfected daily at approximately (time of day). Use at own risk"*. COVID-19 health and hygiene reminder signage will be placed inside restroom stalls.
 - Ramada reservations will be accepted and ramada capacity numbers will be adjusted (see attached) based on size to support limits on the congregation of groups of 10 or more in relation to the space being rented (per Governor Ducey Executive Order).
 - COVID-19 health and hygiene reminder signage will be placed at ramadas.
- The spread of COVID-19 prevention banners will remain on display at each park.

Phase Three: None to Minimal Levels of COVID-19 Transmission

- Open playgrounds.
 - Signage will be placed at playgrounds - *"Per CDC guidelines, playground structures are not disinfected. Use at own risk"*.
- COVID-19 health and hygiene signage will remain at ramadas.
- Signs remain at restrooms and water fountains - *"Restrooms and water fountains are cleaned and disinfected daily at approximately (time of day). Use at own risk"*. COVID-19 health and hygiene signage will remain inside restroom stalls.
- Remove limit of congregating groups of 10 or more in relation to the space being rented for ramada reservations and revert to typical ramada capacity numbers.
- The spread of COVID-19 prevention banners will remain on display at each park.

Phase Four: Availability of COVID-19 Vaccine

- When an FDA tested and approved COVID-19 vaccine becomes available to all willing to be vaccinated, park operations will return to pre-COVID-19 practices.
- Remove COVID-10 related signs.

Park Maintenance Staff Protocols

During Phases One through Three, Park Maintenance staff will continue the policy of one person per vehicle and staff will wear face masks or face coverings when working indoors or within 6 feet of other persons. Frequent monitoring of PPE to ensure availability is required of staff. staff will monitor availability of PPE for staff, and cleaning and disinfectant supplies. Should supplies run low, temporary closures would be implemented until supplies are replenished.

When equipment and shared use of vehicles are required, these will be wiped down with CDC recommended disinfectants prior to and at the completion of every shift or use. A non-touch thermometer has been provided to check staff's temperature at the beginning of each shift. Staff has been provided and will continue to be supplied with hand sanitizer (min of 60% alcohol) when soap and water are not available. Follow current County policies regarding if an employee reports being sick.

During Phase Four, COVID-19 workplace safety measures will be updated per CDC, ADHS and CCHHS guidelines.
