

# Flood Cleanup

Flood water can make the air in your home unhealthy. This is because when things get wet for more than 2 days they usually get moldy. There may also be germs in your home after a flood.

**When cleaning wear**

- ✓ An N-95 respirator (Hardware stores usually sell them.)
- ✓ Goggles
- ✓ Gloves
- ✓ Long pants, long-sleeved shirt, and boots or work shoes

**Clean and dry your house and everything in it.**

Clean and dry hard surfaces. Throw away anything that was wet with flood water and can't be cleaned.

**Use portable generators OUTSIDE and far away from the building.**

The exhaust, or fumes, from a portable generator could kill you in minutes if you breathe it in!

Portable Generator
